

## BASIC CHARACTERISTICS OF THE AREA

<b>POP1</b>	Population	238 692.0 obyv.
<b>POP2</b>	Total area	243.7 ha
<b>POP3</b>	Population density	979.3 pers./ha
<b>POP4</b>	Agriculture land	37.3 %
<b>POP5</b>	Forest land	30.8 %
<b>POP6</b>	Water surface	1.3 %
<b>POP7</b>	Built areas	27.0 %
<b>POP8</b>	Other areas	3.7 %
<b>POP9</b>	Protected areas	0.3 %
<b>POP10</b>	Podíl obyvatel žijících v bytových domech	84.0 %
<b>POP11</b>	Proportion of inhabitants living in family houses	16.0 %
<b>POP12</b>	Proportion of inhabitants connected to the water supply	98.6 %
<b>POP13</b>	Connection to the public sewage system	97.3 %
<b>POP14</b>	Expenditures of the city	942.4 EUR/obyv.

## CLIMATE LABEL

The climate label is the result of evaluating cities, city districts and buildings in terms of their contribution to and adaptation to climate change.

Míra jistoty: 79.2%  
Úplnost dat: 42.9%

It is a summary representation of the overall rating in the form of several concentric circles divided into four quadrants. These illustrate four main areas for assessing the approach of a city, district or building in the area of adaptation to climate change (exposure, sensitivity and capacity) and emission, i.e. greenhouse gas emissions. Each area is further subdivided into smaller slices, which are represented by sub-indicators that represent that area. 5 colours (red, orange, yellow, light green and dark green) are used throughout the label to indicate the negative (red) or positive (dark green) status or development of the system described by the indicators used. Thus, on one label it is possible to assess the status / development of sub-indicators (for example, electricity consumption per person or availability of greenery), whole areas up to the overall status of the system. This is expressed both by the central value of the Klimasken (Climate scan) and by the colour expression.

## INDICATORS OF EXPOSURE TO THE EFFECTS OF CLIMATE CHANGE

<b>EXP1</b>	Annual average air temperature	1.8 °C	●
<b>EXP2</b>	The difference in the number of tropical days in the reference year compared to the long-term average	14.6 den	●
<b>EXP3</b>	Difference in the number of tropical nights in the reference year from the long-term average	0.3 den	●

<b>EXP4</b>	Difference in the highest number of consecutive calendar days without precipitation compared to the long-term average	5.8 den	
<b>EXP5</b>	Number of flash floods in the past 5 years		
<b>EXP6</b>	Frequency of river floods, when the river has overflowed its banks in the last 5 years.		
<b>EXP7</b>	Proportion of the flooded area defined by line Q100 of the total area of the administrative territory of the city/city district/municipality.	3.3 %	
<b>EXP8</b>	Number of days with the occurrence of extreme weather events (strong wind, hail, heavy thunderstorms, iceberg, icing, heavy snow).	54.0 den	
<b>EXP9</b>	Number of days with occurrence of hydrological drought in the last year	0.0 day	
<b>EXP10</b>	Climatic drought expressed by the Standardized Rainfall Evapotranspiration Index (SREI)	0.2 index	

## INDICATORS OF EXPOSURE TO THE EFFECTS OF CLIMATE CHANGE

<b>AD1</b>	The area of green infrastructure	33.5 %	
<b>AD2</b>	Availability of areas of public greenery of adequate quality	55.7 %	
<b>AD3</b>	Built-up, paved impermeable areas	14.8 %	
<b>AD4</b>	Podíl počtu osob zraniteľné populace vůči vlnám veder z celkového počtu obyvatel	11.5 %	
<b>AD5</b>	Podíl území ve městě s rizikem půdních sesuvů z celkové rozlohy administrativního území		
<b>AD6</b>	Podíl počtu kritických objektů v rizikovém území ohrožených přívalovými srážkami z celkového počtu kritických objektů		
<b>AD7</b>	Podíl obyvatel bydlících v záplavovém území Q100 z celkového počtu obyvatel		
<b>AD8</b>	Počet starých ekologických zátěží na území města		
<b>AD9</b>	Podíl počtu obyvatel bydlících v území ohroženém povodněmi z přívalových srážek z celkového počtu obyvatel		
<b>AD10</b>	Podíl počtu kritických objektů ležících v záplavovém území říčních záplav Q100 z celkového počtu kritických objektů		
<b>AD11</b>	Podíl pitné vody na celkové spotřebě vody na zalévání veřejné zeleně		

<b>AD12</b>	Consumption of drinking water in the city / city district / municipality from public sources		
<b>AD13</b>	Average usable capacity of drinking water sources for the needs of the city / city district / municipality per capita of the city/city district/municipality	5.9 ls-1 / 1000 obyvatel	
<b>AD14</b>	Forest vegetation prone to drought		
<b>AD15</b>	Amount of rainwater captured in cadastral area		
<b>AD16</b>	Number of extraordinary climatic events	3.0 počet	

## INDICATORS OF GREENHOUSE GAS PRODUCTION AND REDUCTION

<b>MIT1</b>	Consumption of district heat	4 827 000.0 kg CO <sub>2</sub> e/pers.	
<b>MIT2</b>	Electricity consumption	1 737 600.0 kg CO <sub>2</sub> e/pers.	
<b>MIT3</b>	Consumption of natural gas	2 360 000.0 kg CO <sub>2</sub> e/pers.	
<b>MIT4</b>	Transport performance in individual car transport	694 337 000.0 kg CO <sub>2</sub> e/pers.	
<b>MIT5</b>	Consumption of coal (brown, black) within the administrative territory of the city/city district/municipality		
<b>MIT6</b>	Consumption of other fossil fuels (propane-butane, heating oil, others) within the administrative territory of the city/city district/municipality		
<b>MIT8</b>	Transport performance in passenger rail transport		
<b>MIT9</b>	Transport performance in passenger bus and trolleybus transport		
<b>MIT10</b>	Transport performance in air transport		
<b>MIT13</b>	Amount of mixed municipal waste disposed of in landfills	440.7 kg CO <sub>2</sub> e/pers.	

<b>MIT14</b>	Amount of mixed municipal waste disposed of by incineration	62 773.1 kg CO <sub>2</sub> e/pers.	
<b>MIT15</b>	Total hazardous waste production	151.8 kg CO <sub>2</sub> e/pers.	
<b>MIT16</b>	Wastewater production	8 822 130.0 kg CO <sub>2</sub> e/pers.	
<b>MIT17</b>	Amount of biodegradable municipal waste (BDMW)	14 220.3 kg CO <sub>2</sub> e/pers.	

## INDIKÁTORY PŘIPRAVENOSTI ÚŘADU NA REALIZACI OPATŘENÍ

<b>GOV1</b>	Strategic-institutional situation of the city in the field of adaptation to the impacts of climate change	8.0 %	
<b>GOV2</b>	Funds spent on the implementation of adaptation measures		
<b>GOV3</b>	Existence of a low carbon strategy / policy / action plan		
<b>GOV4</b>	Funds for the implementation of mitigation measures from the total budget of the city / city district / municipality		
<b>GOV5</b>	The share of residential buildings in a given energy standard according to the heat demand for heating		
<b>GOV6</b>	Proportion of public lighting spots replaced by a more efficient source		
<b>GOV7</b>	Instalovaný výkon nově nainstalovaných fotovoltaických panelů na obyvatele		
<b>GOV8</b>	Total power of spare sources for electricity generation		
<b>GOV9</b>	Public buildings in the administration of the city/city district/municipality renovated in order to increase their adaptability to the impacts of climate change.		
<b>GOV10</b>	Readiness of the city/city district/municipality		
<b>GOV11</b>			
<b>GOV12</b>	Number of awareness-raising events for citizens and local actors focused on education and increasing competencies (competences) in the field of climate change		

---

<b>GOV13</b>	Proportion of population with permanent access to one of the sources of information	
<b>GOV14</b>		
<b>GOV15</b>	Proportion of energy from RES (renewable electricity, heat and cold from renewable sources) in public buildings managed by the municipality	
<b>GOV16</b>	Production of energy from renewable sources within the administrative territory of the municipality.	

---
